# Water Main Replacement Group Job 925

## Project Background

Water Group Job 925 is a City-mandated project aimed at replacing aged and deteriorating water mains nearing the end of their service life with new, more reliable materials that are more resistant to deterioration, breaks, and blockages.

## Project Overview

Slated for the Mid-City-Eastern community of Rolando Park located in Council District 7, the project will focus on replacing 1.87 miles of cast iron water mains.

The City recognizes this project will impact those living and working in the community. Precautions will be taken to minimize noise, debris, traffic and parking disruptions.

Construction will take place between 8:30 a.m. and 3:30 p.m. weekdays. While traffic flow will be allowed during construction, residents may see traffic control measures, including detours. At the end of each work day affected streets will completely re-open to normal traffic conditions.

Construction will take place in two separate phases with residents and businesses being notified about work taking place on their street via door hangers no fewer than 5 days prior to construction of that phase.

## Construction Schedule

The anticipated construction schedule for this project is March 2012 through March 2013. Construction work will occur weekdays between 8:30 a.m. and 3:30 p.m.

## Cost

The total estimated cost of this project is \$2.853 million

## Additional Information

Additional information about this and other important infrastructure projects can be found online at [www.sandiego.gov/engineering-cip](http://www.sandiego.gov/engineering-cip), or by calling the public information line at (619) 533-4207.
